**DETAILED ACTION**

***Response to Arguments***

1. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 41-43 are rejected under 35 U.S.C. 102(e) as being anticipated by Krause et al (5,949,948).

Regarding claim 41, Krause et al discloses receiving viewing input data representing a start point of stored digital video (i.e. I frame) and wherein the stored digital video is stored in memory in a non-linear monotonic fashion (col. 9, lines 12-67); and retrieving from memory at least a portion of the stored digital video based on the viewing input data and based on a successive linear approximation operation (col. 10, lines 1-21).

Regarding claim 42, Krause et al discloses determining a start memory location from which to retrieve at least a portion of the stored digital video based on the viewing

input data and based on successive linear approximation operation (col. 9, line 12 – col. 10, line 21).

Regarding claim 43, Krause et al discloses that the stored digital video comprises MPEG video and audio data (col. 1, lines 15-33).

***Allowable Subject Matter***

4. Claims 21-40 are allowed.

5. The following is an examiner's statement of reasons for allowance: the prior art fails to disclose obtaining a specific start time of at least a portion of digital video represented as a t coordinate; selecting a minimum n-coordinate and a maximum n-coordinate to bound a specific start location of the digital video represented as an n-coordinate; obtaining a minimum t-coordinate based on the minimum n-coordinate; obtaining a maximum t-coordinate based on the maximum n-coordinate; deriving a linear reference between the minimum n and t coordinates and the maximum n and t coordinates; obtaining a reference n-coordinate lying on the linear reference based on the t-coordinate; determining a reference t-coordinate lying on a non-linear monotonic, function, representing digital video stored over time, based on the reference n-coordinate; determining whether the reference t-coordinate is substantially similar to the t-coordinate; when the reference t-coordinate is substantially similar to the t-coordinate, determining that the reference n-coordinate is substantially equal to the n-coordinate, wherein the t-coordinate and the n-coordinate define a starting point of digital video; and retrieving from memory the digital video based on the starting point.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Krause et al and Brewer et al disclose retrieving data from a medium storing data in a non-linear monotonic manner.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
